Course Overview

The immediately loaded full-arch restoration is one of the fastest growing segments in implant dentistry today. We will examine a guided immediate loading full-arch procedure and the flexibility it brings to the same-day surgical and prosthetic phases.

Learning Objectives

Upon completion of the course, the participant will:

- Learn how guided surgery results in fewer appointments and less chair time for immediately loaded full-arch prostheses
- Learn how to enhance collaboration between the surgical, restorative and laboratory teams
- Understand how to reduce overhead and treatment time for implant restorations

Presenter: **Ozzie Richi, MDT, NDX Implant Director**

Ozzie Richi, MDT, has worked in all facets of dental technology for the past 28 years and specializes in implants. He has helped with the development of several implant companies' systems and products available on the market today. Mr. Richi helped develop and grow several laboratories' implant departments across the country and once owned a laboratory producing only high-end, quality implants in New York City. Currently, Mr. Richi is the Implant Director for National Dentex. He lectures across the country on immediate loading, nSequence Guided Prosthetics® and the latest advances in implant technology.

ADA C.E.R.P.® Continuing Education Recognition Program

National Dentex is an ADA CERP Recognized Provider.

ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

National Dentex Corporation designates this activity for 2 continuing education credit.
