

Juvora[™]

Ultra-light Material Designed For Patient Comfort

Juvora is indicated as a substructure/framework for implant bars, crowns and bridges, and Maryland bridges. When our skilled ceramists layer Juvora with Ceramage[®] (zirconium silicate micro-ceramic), the results are restorations that exhibit virtually the same light transmission as natural teeth.

Benefits of using Juvora:

- Peek-Optima[™] polymer flexes slightly due to its bone-like modulus of elasticity
- Extremely strong & durable
- Radiolucent

Ceramage to Juvora Crown	\$168
Juvora Maryland Bridge with Ceramage Pontic	\$314
Screw-retained Implant Ceramage to Juvora Crown	\$209
Juvora Bar per Implant Site	\$335
Implant Bundle	\$414
Includes: Screw-retained Implant Ceramage to Juvora Crown, Atlantis [®] Titanium Abutment, Screw, Articulation, Soft Tissue Model, Lab Analog, Atlantis Abutment Insertion Guide
