

NDX[®] nSequence

nSequence[®] is now available for Zygoma cases!

The Leader In Guided Full Arch Surgery Is Now Offering A New Option To Make This Treatment More Available To Your Patients.

Guided immediate loading of the full arches with Zygomatic implants is possible with the newest advancement to the nSequence Guided Prosthetic[®] Workflow.

The same nSequence design you are familiar with, including:

- A unique proprietary “double barrel” design to optimize guide control of drills
- Available designs for Extra-sinal or Intra-sinal, dependent on patient anatomy
- Designed to guide one or more primary drills
- Minimum of four total implants for immediate loading required

Call 888.809.2777 for more information about nSequence with Zygomatic Implants.
