

DISCLAIMER OF LIABILITY

The NDX Prosthetic Guide, a single use and by-prescription only product, has been designed to mimic tooth spacing with a pilot drill hole between the central fossa and the top of the ridge, specific to the patient for which the NDX Prosthetic Guide was prescribed. This NDX Prosthetic Guide has not been fabricated from a radiograph or CBCT scan. Therefore, it is NOT to be used to simulate implant depth, angulation, rotation or general position. The implant team should still take a radiograph so that there is an adequate understanding of the bone. Drilling should not proceed until planning, implant depth, position and angulation are determined by the surgeon and/or clinician. This product does not dictate or predict or guide implant depth, position or angulation of the drilling, as these are medical decisions for the patient's surgeon and/or clinician.

The NDX Prosthetic Guide and the guidelines provided herein are not intended to provide diagnosis or treatment and are not sufficient to allow inexperienced clinicians or surgeons to administer professional implant treatment or prosthetic dentistry. The guidelines are not intended to be a substitute for formal training and certification or license. The NDX Prosthetic Guide should only be used by clinicians or surgeons with training and experience specific to their clinically accepted application. National Dentex Labs is not liable for damages resulting from treatment using the NDX Prosthetic Guide. Responsibility and liability rest strictly with the medical provider and user of the NDX Prosthetic Guide.

Neither the NDX Prosthetic Guide nor the guidelines provided herein are intended to provide diagnosis or treatment. The NDX Prosthetic Guide is not intended to offer medical, dental or surgical advice, nor shall it be a substitute for the administering surgeon or clinician's expertise. The surgeon or clinician administering the NDX Prosthetic Guide has the duty to determine whether or not this product is suitable for the particular patient and dental circumstances. National Dentex Laboratories disclaims any liability, expressed or implied, and shall have no responsibility for any direct, indirect, punitive, consequential or other damages, arising out of or in connection with the use of, or any errors resulting from the use of the NDX Prosthetic Guide.
