

# Improve Implant Restoration Aesthetics with NDX Prosthetic Guides

Patients want lasting, beautiful restorations. Understanding the proper angulation for your abutments may lead to better aesthetics and a happier patient. With **NDX Prosthetic Guides**, you have the ability to plan for optimal aesthetic outcomes:

- Guides are designed from STL files or a scan of a model to ensure a clear representation of present dentition, which allows for better aesthetics
- Guides are lightweight and easy-to-use in the mouth, optimizing patient comfort
- Guides are delivered quickly to the dental implant office

Try an **NDX Prosthetic Guide** today and simplify your next implant case! For more information or to order a guide, please contact your local NDX laboratory.
