

Simple Steps to a Maximum Protrusive Measurement

- Instruct the patient to protrude their mandible as far as possible
- While in the most protrusive position, use a ruler to measure from the labio-incisal of the upper centrals to the lingual-incisal of the lower incisors

Features & Benefits

- Save chair time - small size makes it easier to seat
- Protection reduces clenching intensity by nearly 70%, protecting teeth, muscles and joints
- More options - several design options available

Indications

- Tooth wear from bruxing and clenching
- Migraines and Tension headaches
- Muscle pain associated with parafunction
- TMD
- Diagnostic treatment planning

Contraindications

- Advanced periodontal disease

Patient Care Instructions

- Simply run the device under warm water (no toothpaste) each time you remove it
- Do not use alcohol or alcohol-based products for soaking or cleaning
- Never boil the NTI-tss Plus

What to Send

- Full arch VPS impressions, models or digital files
- Maximum protrusive measurement
- Centric occlusion bite registration

Insurance Codes

All plans are different, therefore the coverage may vary. In general, the same insurance codes for splints, TMJ appliances and habit appliances all apply to the NTI-tss Plus.

Turnaround Times

Please allow two weeks for case turnaround.
