

NDX Digital Dentures

ADVANCED TECHNOLOGY > FUNCTIONAL STRENGTH > EXCEPTIONAL AESTHETICS

Leading the Way for NDX Digital Dentures

Since 1977, dentists have trusted NDX Rogers to craft dentures, partial denture frameworks, crowns and bridges, veneers and fixed implant restorations. Today, we offer extraordinary Digital Dentures using the latest technologies and materials.

Once a digital scan is received, our highly skilled designer, Chris Smith uses precision and accuracy to turn your digital file into an optimal 3D-printed denture. Chris has more than 40 years of denture experience and more than six years of digital denture experience. He trains other NDX lab technicians nationwide on digital denture design and fabrication.

Our highly skilled technicians finalize each digital denture using unparalleled craftsmanship ensuring the highest quality and most aesthetic denture is created. **Before the denture is sent to the dentist, it undergoes three quality assurance checks to ensure it exceeds the expectations of the dentist and patient.**

“One of the most rewarding things about creating digital dentures is knowing we can take our craftsmanship and apply it digitally into a product that will give the patient a denture that they can feel comfortable and confident with.”

HIGHER PATIENT SATISFACTION

- Digital dentures provide adaptation to anatomy for an accurate, more comfortable fit
- The digital denture process creates a permanent digital record to replace lost or damaged dentures for three years

IMPROVED EFFICIENCY AND PROFITABILITY

- Eliminate at least two chair appointments with a more efficient denture workflow
- Increase your production and improve office efficiency by decreasing remakes

ECONOMY AND PREMIUM DENTURE OPTIONS

- Premium and Economy Digital Dentures are both made from break-resistant materials
- The Economy Digital Denture is a great option for dentists looking for a transition denture, especially for the immediate digital denture workflow

“We now have the ability to reduce the amount of time before a patient can have their dentures. Most importantly for me has been the reliability and accuracy of the fit and aesthetics.”

**DR. LUIS MARIUSSO –
Knoxville, Tennessee**
