

An Exceptional Lab Partner

NDX Rogers has been a trusted partner for dentists since 1977, providing a range of services including crafting dentures, partial denture frameworks, crowns and bridges, veneers and fixed restorations. They have also been offering consultations, implant treatment planning and chairside services since the 1980's.

The team at NDX Rogers is committed to staying up-to-date with the latest technologies and applying them to enhance patient experiences. Their highly trained technicians, with an average of more than 25 years of dental experience, are dedicated to delivering top-quality personalized service, ensuring that they exceed expectations.

“

NDX Rogers is dedicated to ensuring that you and your patients receive the attention you deserve.”

JAY ROGERS, GENERAL MANAGER

NDX Rogers features comprehensive lab services, including:

Dedicated Customer Service and Account Support

Gain access to extraordinary customer care representatives and account support experts. We're committed to promptly following up on all of your case needs while helping you find new opportunities to optimize your business.

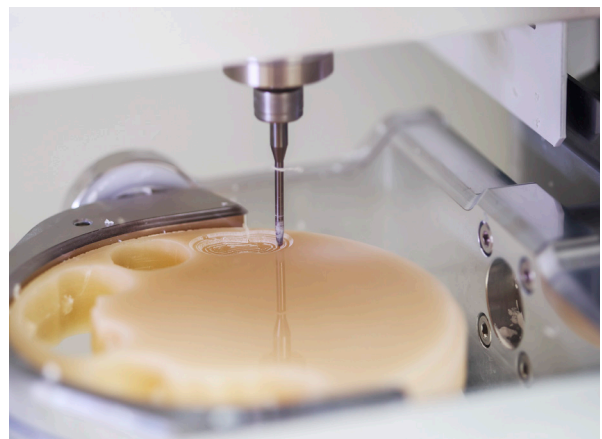

Technical Support and Chairside Expertise

Receive support throughout every step of the restoration process. Our on-site certified technicians and technical support managers are here to help you minimize adjustments, eliminate additional chair time and improve your patients' overall dental experience.

Pick-Up and Delivery Services

Quality restorations are delivered anywhere in the United States — no matter where your practice is located.

State-of-the-Art Milling Centers

We design the most accurate restorations, fitted for your patients' needs and budgets.

NDX Rogers provides products that exceed the expectations of your patients.

Find the latest options for flexible partials and a variety of custom appliances to treat sleep apnea. We offer products with a lifetime guarantee such as Verotek® Crowns and have strong relationships with implant companies that span many years.

Featured Products

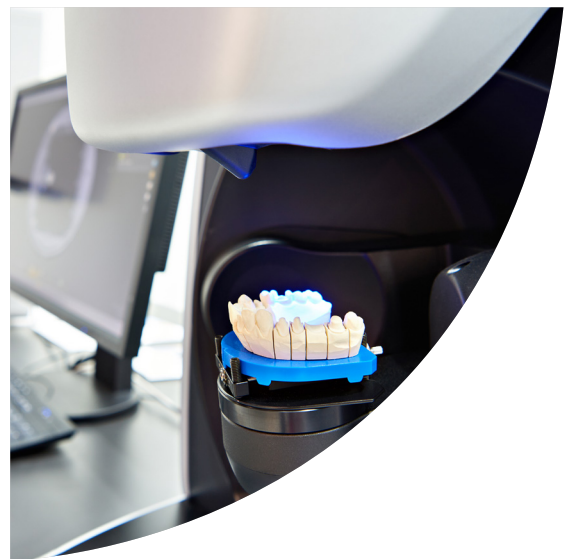

Implants

NDX Rogers has experience working with all implant systems from various manufacturers and offers OEM for a single- or multi-unit implant cases.

NDX Digital Dentures

The 3D-printed digital denture workflow provides a seamless production process by combining technology with existing techniques. Digital dentures can be completed in as little as three chairside appointments — saving time for your and your patients.

As dentistry evolves and practices grow, one thing remains the same: giving your patients the best possible care — at every visit. That means finding a partner to help you enhance your capabilities, optimize your digital workflows, help your team learn new skills and help you create the most realistic and comfortable restorations to keep your patients smiling.

Meet Our Family!

We believe that the key to a great relationship is to make our doctors feel like they are a part of our family. Experience the open communication, personalized service and consistent quality of NDX Rogers.
